DETAILED ACTION

Non-Elected Invention

1. Newly submitted claims 19-21 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the claims are directed to a force sensor with sleeve, and specific bending elements which are not the subjected of the original claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, these are claims withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding this claim , the word “und” must be changed to –and--. The term “magnetic filed sensor suite”, lacks proper antecedent bases.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 9, 11-12, and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al.

Regarding claim 9, Lee et al., discloses an apparatus for measuring adhesive and friction properties of polymer with features of the claimed invention including a holder (element 3), to support a magnetic field sensor (element 911), the holder has a spring element (element 33) so that the motion of the holder by any means, does not change the clearance between the magnet (element 32) and the magnetic field sensor.

Regarding claims 11, 17, the spring element is a sheet form.

Regarding claim 12, the holder is round shape

Art Unit: 2855

6. Claim 13 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 15-16 are allowed over the prior art of the record..

Response to Amendment

8. Applicant's amendment and arguments filed 10/20/08 have been fully considered but they are moot in view of the new ground of rejection. The applied art show a holder for a magnetic sensor such that the holder has a spring, its movement does not effect the sensor configuration.

9. THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
